WHAT TO DO

HIKING

California State Parks offer literally thousands of miles of hiking trails, whether you want to go for an easy stroll on a boardwalk, embark on a daylong hike or even camp overnight in the wilderness. Guided hikes are available at many parks too.

BIRD WATCHING

Bring your binoculars, field guide and your wildlife list and check off dozens of bird species during your state park adventure. Some birds are permanent residents while others migrate through during certain seasons. Shorebirds are ever-present on the beach.

BACKPACKING

Some parks offer the opportunity to backpack overnight. Carry all your essentials on your back and camp at a primitive campsite along your route. Ask park staff about any necessary reservations or permits before you go.

MOUNTAIN BIKING

No matter your experience or skill level, we have mountain bike trails that promise fun and adventure. Some are winding single-track through the mountains while others are gentle double-track trails more suitable for families.

OHV

Our State Vehicular Recreation Areas are ideal for riding your motorbike or all-terrain vehicle. Some have obstacle trial areas and professionally designed motocross tracks available. Always follow safety laws and regulations.

GEOCACHING

Many of California's state parks offer this fun activity in which hidden containers, known as geocaches, are found in the park by an individual or group using a hand-held GPS for navigation.

FISHING

Whether you prefer fly fishing on a mountain river or stream, fishing from a boat in a lake, ocean fishing or casting from the shore, California's state parks have something to offer. Ask about fishing licenses and other regulations at the park.

BOATING

Many parks offer access and amenities for boating, sailing and paddling. Check online to see which parks offer ramps, boat campsites, mooring and other facilities. Always remember to wear lifejackets.

INSIDER TIPS

PETS IN PARKS

Make sure you always clean up after your dog and keep it on a six-foot leash. It's always good to call ahead to see whether pets are allowed and if restrictions apply. All vaccinations must be current.

HELP PRESERVE OUR PARKS

Follow the seven Leave No Trace principles: plan ahead and prepare; travel and camp on durable surfaces; dispose of waste properly; leave what you find; minimize campfire impacts; respect wildlife; and Be Considerate of Other Visitors.

VOLUNTEER PROGRAMS

Volunteer Programs are available to benefit the state park visiting experience. Volunteers help preserve the parks by helping clean up shorelines and campsites, help maintaining trails and more. Call a park for more information.

WATERFALLS

There are 24 waterfalls in 16 of California's state parks, and they range from 10 feet to 600 feet in size. Call ahead or browse through www.parks.ca.gov to find out which parks have these sight-seeing jewels.

GET HITCHED

Looking to have your dream wedding in a beautiful outdoor setting? Consider a state park! For listings of wedding locations, visit the California State Parks website and look under events/meetings.

EDUCATIONAL PROGRAMS

A variety of programs are offered year round at California's state parks. The programs include Junior Rangers, Campfire Programs, Guided Hikes, Nature Walks, Ranger Buddies, etc. Note that different parks provide different types of programs.

HISTORY SEEKERS

Origins of a park's location, the people who first settled, lived, and cultivated the park are found in several state parks. Old military forts, native fishing villages and community halls are a few of the many historic elements highlighted.

WHALE WATCHERS

Starting in December to March, visitors get the chance to see the gray whale. Gray whales are California's official marine animals; they are incredible to view live as they migrate past coastal parks.

AQUATIC SAFETY

Not all beaches are recommended for swimming or wading. Large surf, cold water, backwash, sudden drop-offs, pounding shorebreak and dangerous rip currents can turn fun activities into hazardous ones.

Lifeguard service is limited along some portions of the coast. Check with park staff about the ocean conditions. Be aware that conditions may change quickly. When in doubt—don't go out!

Rip Currents

These are powerful, channeled currents of water flowing away from shore. Rip currents can occur at any beach with breaking waves or where there is a stream or outflow into the surfline.

Steep Beaches

Beaches with a steep face can be dangerous to those who venture too close. Stay back on the dry sand, and do not play tag with the waves. Never turn your back to the waves, and supervise children.

In An Emergency, Call 9-1-1:

Try to remain calm. Keep your eyes on the person in trouble. Give a clear explanation of your location and stay on the line until you are told otherwise. Throw the victim something that floats, and yell instructions on how to escape rip currents by having the victim swim in a direction following the shoreline.

California State Parks Lifeguards perform approximately 10,000 water rescues each year.

CALIFORNIA
STATE PARKS
FOUNDATION

The CSPF is the only statewide independent nonprofit membership organization dedicated to protecting, enhancing and advocating for

California's magnificent state parks. Our parks face many threats, like the loss of programs and lack of development funds. In light of these challenges, we have been making advances in advocacy, funding park projects, legislative action, public education, and mobilizing volunteers.

Please join us to ensure that our state parks continue to thrive for future generations. Visit www.calparks.org

We would like to thank the Proud Partners of the California State Parks:
